EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Kevin Zilka on April 5, 2007.

The application has been amended as follows: Please see attached.

The following is an examiner's statement of reasons for allowance:

In reference to claims 48 and 49:

Amendments to the claims overcome the prior art rejections made in the previous action. Gryaznov failed to teach scan dividing logic that divides an on-access malware scan in response to a complexity metric exceeding a predetermined threshold where the complexity metric is dependent on a computer file, level of nesting of embedded computer files, an initial attempt to scan said computer file which exceeded a predetermined time and a level of utilization of local processor and wherein an amount of said complexity metric that exceeds the predetermined threshold determines a number of tasks into which said on-access malware scan is divided. None of the other references cited in the prior action combine with Gryaznov to disclose the limitations of claims 48 and 49.

Art Unit: 2132

An updated search did not uncover any new prior art not owned by the same assignee of the instant application. All other pending claims are dependent on allowable claims 48 and 49 and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
